
Phlebotomy Technician – Harborview School of Phlebotomy

Lead instructor, Catherine R. DeRose, LNPA, has been a Certified Phlebotomy Technician for 38 years and the lead instructor for the American Red Cross Phlebotomy Technician Program since 2008.

This course is designed to teach and give hands on training to individuals desiring to enter the field of allied health care. The primary goal is to instill the latest information on blood collection techniques, skills and equipment for a safe and effective specimen collection thus enhancing customer service and promoting patient care. This program includes 72 hours of classroom instruction. The curriculum meets all requirements necessary to sit for the NHA National Board Certification for Phlebotomy Technicians. The Harborview School of Phlebotomy's program trains students in venipuncture and dermal puncture techniques. Students obtain hands on clinical internship on site. Upon completion of classroom training, students will receive a certificate of completion, and a Phlebotomy pin.

Day and evening classes are offered – Day program: 9:00am-3:00pm on Monday, Wednesday & Friday during 4 weeks. Evening program: 5:30pm-9:30pm on Tuesday and Thursday during 9 weeks.

Upon completion of this program, students must successfully complete the Registered Phlebotomy Technician certification exam to gain employment as a Certified Phlebotomist/Phlebotomy Technician. Uniform, books, and exam fees will be covered by HCAP.

A suitability interview is required to discuss your professional goals and your reasons for pursuing a career as a Phlebotomy Technician.

Note: Persons with criminal convictions may have difficulty finding employment in the healthcare industry.
